Annex E.5 :

Replace

RESTRICTION 4: For every recursive instance of property q in the declaration of property p , each actual argument expression e of the instance satisfies at least one of the following conditions:

- e is itself a formal argument of p .
- No formal argument of p appears in e .
- e is passed to a formal argument of q that is typed and the set of values for the type is bounded.

With:

RESTRICTION 4: For every recursive instance of property q in the declaration of property p , each actual argument expression e of the instance satisfies at least one of the following conditions:

- e is itself a formal argument of p .
- No formal argument of p appears in e .
- ~~e is passed to a formal argument of q that is typed and the set of values for the type is bounded.~~
