

P1364 Update

Tom Fitzpatrick, Chairman
Neil Korpusik, Co-Chairman

P1364 Draft Status

- P1364-2005 Draft 4 distributed for review 12/8/04
 - Includes all changes approved as of the last P1800 meeting on 22-Nov-04
 - Reviewer comments due back 23-Dec-04
- Draft 5 13-Jan-05 to include:
 - Encryption Proposal (see slide 5)
 - PLI1.0 Deprecation
 - Issues approved at today's meeting

P1364-BTF Status

- 5 issues approved as of 29-Nov meeting
 - Will be in 1364-2005-D5
 - 354*: add \$feof function
 - 387: allow subset of system functions to be called at elaboration
 - 390: add math functions (\$clog2, \$sin, etc.)
 - 547*: allow zero replication in concatenation
// { {0{a}}, b}
 - 640: “uwire” type for single-driver net
- Next BTF meeting in January

* Passed at 1-Nov-04 meeting

P1364-ETF Status

- Passed #609
 - Referred back from Champions. All issues addressed, with no changes required
- Consensus that Keywords proposal should be incorporated in P1364 if it passes P1800
- Next meeting in January (10th or 24th)

P1364 Issues

- Some outstanding issues raised by Shalom about the Encryption Proposal
 - Do we want current proposal to go out knowing that it likely will have to be reworked?
- Shalom will be unavailable end of April, 2005 to work on incorporating feedback from ballot.
 - Shalom will be available for questions via email
 - Stu has volunteered to help out
 - P1364 could be at risk if there are a lot of P1800 comments
