

# Committee Status 5/28/09

**Neil Korpusik**

P1800 Technical Chair

# SV-AC

- Main work during the last period was dedicated to ballot issue resolution.
- All ballot issues have been resolved (13) or waved (9) by the committee and sent to the champions for review.
- The champions requested additional changes in the resolution of the following Mantis items:
  - 2562 rand qualifier for checker variables is not reflected in BNF
  - 2654 Error in an example of throughout operator
  - 2659 Backward compatibility issue with sequence property
  - All requested changes have been done and approved by SV-AC.
- Remaining activity: Proofreading of the final version of the LRM (conditional on approval by the champions and the working group)

# SV-BC

- Has completed “must-have” issues and can resolve more issues if given time.
  - > 14 mantis items covering ballot feedback not yet resolved
  - > 35 mantis items are in resolved state
- Possible agenda for June 1<sup>st</sup> conference call
  - > 2380
  - > 2690 Appears to be resolved by Mantis 1492
  - > 2663 Appears to be addressed by response to reflector
  - > 2664 Appears to be addressed by response to reflector
  - > 2665 Appears to be addressed by response to reflector
  - > 2666 Needs a proposal
  - > 2667 Needs a proposal
  - > 2668 Needs a proposal
  - > 2669
  - > 2677 Needs a proposal
  - > 2697 Consider denying altogether or for at least this round.
  - > 2720 Needs a proposal

# SV-CC

- 28 mantis items are in the resolved state

# SV-EC

- 80 ballot comments were processed by the committee
  - > 31 mantis items resolved
  - > 1 in feedback state (requires pdf file in place of html)
  - > 20 mantis items require more work
    - 9 should be trivial to resolve (proposals exist, duplicates, or won't fix)
  - > 8 ballot comments received from SV-BC, 2 sent to SV-AC, 2 jointly w/SV-CC
- The committee met 4 times
- Mantis 2380
  - > Several people feel this issue needs to be resolved
  - > There is a contradiction in a “central portion of the LRM”, not a corner case
  - > No proposal yet, has been discussed on the reflector
  - > Issue with “assignment compatibility”, array assignments have different rules
  - > Possible backward compatibility issue as a result of making changes

# Champions

- Held 2 conference calls and 3 email votes over the past 3 weeks
  - > Processing the results of all this activity is still in progress
  - > There may be a couple still in-between the TC and the Champions
- There are 4 that didn't get enough email votes to pass (May 27<sup>th</sup> email vote)
